PROFESSIONAL SUMMARY

Diligent **Backend Engineer** with solid foundation in developing and maintaining software applications. Proven track record in implementing efficient code and contributing to significant projects. Demonstrated expertise in problem-solving and collaborating within cross-functional teams.

SKILLS

- Python
- Quality assurance
- Version control
- SDLC compliance
- SQL
- Object-oriented programming
- Algorithms and data structures
- Problem-solving
- Database Design and Management
- HTML and CSS
- API integration and Design
- CI /CD Pipelines

EXPERIENCE

07/2025 - Current

Backend Software Engineer Intern

Cyncra Technologies *- (Remote)*

- Worked with design teams and Senior Software Engineers to build customized software products for consumers.
- Partnered with team members to learn best practices in software design.
- Demonstrated strong problem-solving skills by troubleshooting complex technical issues during the development and testing phases of software projects.
- Improved software functionality by implementing and testing new features for a web application project.
- Brainstormed with engineering team to determine appropriate code testing processes.
- Delivered comprehensive documentation outlining software requirements, architecture, and design decisions for future reference.
- Enhanced user experience by incorporating feedback into iterative design of software interfaces.
- Proved successful working within tight deadlines and a fast-paced environment.

EDUCATION

02/2025

Certificate: Software Engineering

ALX Africa*-Lagos*

- Course work in Algorithms, System Design, Web Development, File I/O , and Data structures.
- Developed and maintained a marketplace platform using Django, integrating API functionality for location-based searches and item listings.
